
Test Report

Purpose:

1. Compare the build-up of debris in PermaFLOW compared to Conventional polypropylene P-Trap

Test set up:

1. Install Conventional P-Trap and PermaFLOW in the same house.
2. Conventional P-Trap installed in the low usage guest bathroom
3. PermaFLOW installed in the high usage Master bathroom.
4. Similar Flow Rate Faucets on both sinks
5. Pictures taken after One year - P-Trap was cut to take pictures

Debris Build-up in Conventional P-Trap after 1 year – breeding ground for Mold/Bacteria etc

PermaFLOW – after 1 year
